EXECUTIVE PROFILE

Junior Full-Stack Developer operating at the intersection of web architecture and AEC digital transformation at BIMPulse. Specializes in building modular Python backends, Django REST APIs, relational PostgreSQL schemas, and modern responsive frontends. Certified by DataCamp in Applied AI Engineering (LLMs, RAG) and Python Data Analytics.

VERIFIED CREDENTIALS

AI Engineer for Developers Associate

DataCamp — Issued Apr 2026

`AIEDA0011678564836`

Python Data Associate

DataCamp — Issued Feb 2026

`PDA0019412806212`

Cybersecurity Fundamentals

المدرسة - Almdrasa — Feb 2026

`77F16BFF2A-77EB48CD64-1451D2521`

Associate Python Developer

DataCamp · 30 HR Track — Nov 2025

`#736,739 Statement`

CORE CAPABILITIES

DEVELOPMENT (CORE)

Python | Django | Django REST | PostgreSQL | SQL Optimization | React | TypeScript | HTML5 / CSS3 | RESTful APIs

DATA & APPLIED AI

Pandas | Matplotlib | Data Pipelines | LLM APIs | RAG Concepts | Prompt Engineering

SYSTEMS & TOOLS

14 RBAC Roles | Design Patterns (GoF) | WebAssembly (Pygbag) | Three.js | Git / GitHub | Docker | Unit Testing

EDUCATION & TRACKS

Backend Architecture & Systems
Specialized Track · Self-directed
2023 – 2026

Career Track: Backend Developer
DataCamp Professional Path
Certified Continuous Learning

Data Science & Analytics Foundations
DataCamp Skill Track
Certified Continuous Learning

LANGUAGES

English (Professional) | French (Professional) | Arabic (Native)

PROFESSIONAL EXPERIENCE

Junior Full-Stack Developer

AUG 2026 — PRESENT

BIMPulse • Casablanca, Morocco (Apprenticeship)
Connecting software development with BIM, engineering, and AEC digital transformation

- Contributing to **BIMPulse Academy**, an enterprise learning platform for AECO (Architecture, Engineering, Construction & Operations) professionals.
- Engineered backend services and relational data models complying with international **BIM / IFC industry standards**.
- Developed performant backend APIs in Python & Django coupled with modular, accessible client-side interfaces.
- Acknowledged by senior engineering leadership on LinkedIn for architectural contributions to production platform milestones.

`BIMPulse Academy` `BIM / IFC` `Python & Django` `PostgreSQL` `Digital Solutions`

Django & Backend Developer

MAY 2026 — PRESENT

Production & Self-Directed Web Architecture
Casablanca, Morocco

- Engineered enterprise-grade **Role-Based Access Control (RBAC)** supporting 14 distinct roles with granular permission matrices.
- Eliminated the **N+1 query bottleneck** using eager loading (`select_related` and `prefetch_related`), reducing loop query latency to constant O(1) performance.

- Built robust Django REST Framework endpoints with JWT authentication, custom query search indexing, and automated transactional emails.

`Django REST` `14 RBAC Roles` `O(1) Eager Loading` `PostgreSQL`

Python Developer & Data Systems

JAN 2020 — PRESENT

Core Systems & Automation

- Built automated data extraction pipelines, unstructured log tokenizers, and algorithms across the Python ecosystem.
- Designed modular object-oriented software implementing classical Gang of Four design patterns and strict PEP-8 compliance.

`Python 3.12` `Pandas` `Data Pipelines` `Design Patterns`

KEY PRODUCTION PROJECTS

The Modern Journal — Architectural Django CMS

`14 RBAC Roles`

Production-ready multi-user publishing platform with author telemetry dashboards, constant O(1) database query resolution, custom full-text search indexing, and automated email workflows.

O(1) Queries · RBAC Security · Live Analytics

PyGame 3D Web Arcade & WASM Console

`16 Games WASM`

Compiled 16 native Python PyGame classics into client-side WebAssembly via Pygbag. Features interactive 3D cabinet selector with dynamic Three.js lighting and locked 60 FPS WebGL rendering.

16 Python Games · Three.js 3D · WebAssembly

Dev-Pulse — Developer Activity Telemetry

`<200ms Reports`

High-throughput developer telemetry engine parsing unstructured system logs with Pandas; generates automated Matplotlib statistical performance visuals with 100% privacy-first local processing.

100% Local · Pandas Pipeline · Matplotlib
