Learn Functional Programming in Python
Learn to Code in Python

Abdellah BELMAARIS

Self-Taught Backend & Web Developer | Python data associate | AI & Data Analysis Enthusiast | Cybersecurity Fundamentals | Building Real-World Projects

Casablanca, Casablanca-Settat, Morocco

Summary

I am a homeschooled learner from Morocco with a strong passion for technology and software development. I have developed practical skills in Python, data analysis, and artificial intelligence through hands-on courses, certifications, and personal projects. I have experience working with Pandas, Matplotlib, SQL, and Django, as well as a solid understanding of algorithms, data structures, and software engineering fundamentals. I enjoy building projects, solving problems, and continuously learning new technologies. I am particularly interested in applying my skills to real-world challenges and collaborating with others. Currently, I am focused on expanding my technical expertise and gaining practical experience in software development and data-related fields.
